India Migration Report 2018 looks at Indian migrants in Europe and their lived experiences. It looks at how over the last few decades, the European Union has emerged as the preferred destination for Indian migrants surpassing the United States of America—and is home to Indian students and high-skilled professionals ranging from engineers to medical graduates, contributing to the economy and society both at the countries of origin and destination. The essays in the volume look at a host of themes and issues, including agreements India has signed with the EU, the Blue Card, the impact of BREXIT and the plight of unskilled workers.

The volume will be of great interest to scholars and researchers of development studies, economics, sociology and social anthropology and migration studies.
